Bay Area Air Quality Management District

939 Ellis Street San Francisco, CA 94109 (415) 771-6000

Final

MAJOR FACILITY REVIEW PERMIT

Issued To: Owens-Brockway Glass Container Facility # B1362

Facility Address:

22302 Hathaway Avenue Hayward, CA 94541

Mailing Address:

One Seagate Toledo, Ohio 43666

Responsible Official

Phyllis Cresswell, Plant Manager 510-781-0123

Facility Contact

Pam Fernandez, Plant Site Manager 510-784-0881 ext. 304

Type of Facility:	Manufacturing glass container	BAAQMD Permit Division Contact:
Primary SIC:	3221	Dharam Singh
Product:	Glass Container (bottleware)	-

ISSUED BY THE BAY AREA AIR QUALITY MANAGEMENT DISTRICT

Permit for Facility #: B1362 Expiration Date: October 31, 2004

ID: DNS

I. STANDARD CONDITIONS

A. Administrative Requirements

The permit holder shall comply with all applicable requirements in the following regulations:

BAAQMD Regulation 1 - General Provisions and Definitions

(as amended by the District Board on 10/7/98);

SIP Regulation 1 - General Provisions and Definitions

(as approved by EPA through 8/27/99);

BAAQMD Regulation 2, Rule 1 - Permits, General Requirements

(as amended by the District Board on 10/7/98);

SIP Regulation 2, Rule 1 - Permits, General Requirements

(as approved by EPA through 1/26/99);

BAAQMD Regulation 2, Rule 2 - Permits, New Source Review

(as amended by the District Board on 10/7/98);

SIP Regulation 2, Rule 2 - Permits, New Source Review and Prevention of Significant Deterioration

(as approved by EPA through 1/26/99);

BAAQMD Regulation 2, Rule 4 - Permits, Emissions Banking

(as amended by the District Board on 10/7/98); and

SIP Regulation 2, Rule 4 - Permits, Emissions Banking

(as approved by EPA through 1/26/99).

B. Conditions to Implement Regulation 2, Rule 6, Major Facility Review

- 1. This Major Facility Review Permit was issued on November 1, 1999, and expires on October 31, 2004. The permit holder shall submit a complete application for renewal of this Major Facility Review Permit no later than April 30, 2004 and no earlier than October 31, 2003. If a complete application for renewal has not been submitted in accordance with these deadlines, the facility may not operate after October 31, 2004. (Regulation 2-6-307, 404.2, & 409.6; MOP Volume II, Part 3, §4.2)
- 2. The permit holder shall comply with all conditions of this permit. The permit consists of this document and all appendices. Any non-compliance with the terms and conditions of this permit will constitute a violation of the law and will be grounds for enforcement action; permit termination, revocation and re-issuance, or modification; or denial of a permit renewal application. (Regulation 2-6-307; MOP Volume II, Part 3, §4.11)
- 3. In the event any enforcement action is brought as a result of a violation of any term or condition of this permit, the fact that it would have been necessary for the permittee to halt or reduce the permitted activity in order to maintain compliance with such term or condition shall not be a defense to such enforcement action. (MOP Volume II, Part 3, §4.11)
- 4. This permit may be modified, revoked, reopened and reissued, or terminated for cause. (Regulation 2-6-307, 409.8, 415; MOP Volume II, Part 3, §4.11)

I. Standard Conditions (continued)

- 5. The filing of a request by the facility for a permit modification, revocation and reissuance, or termination, or of a notification of planned changes or anticipated non-compliance does not stay the applicability of any permit condition. (Regulation 2-6-409.7; MOP Volume II, Part 3, §4.11)
- 6. This permit does not convey any property rights of any sort, nor any exclusive privilege. (Regulation 2-6-409.7; MOP Volume II, Part 3, §4.11)
- 7. The permit holder shall supply within 30 days any information that the District requests in writing to determine whether cause exists for modifying, revoking and reissuing, or terminating the permit or to determine compliance with the permit. (Regulation 1-441, Regulation 2-6-409.4 & 501; MOP Volume II, Part 3, §4.11)
- 8. Any records required to be maintained pursuant to this permit which the permittee considers to contain proprietary or trade secret information shall be prominently designated as such. Copies of any such proprietary or trade secret information which are provided to the District shall be maintained by the District in a locked confidential file, provided, however, that requests from the public for the review of any such information shall be handled in accordance with the District's procedures set forth in Section 11 of the District Administrative Code. (Regulation 2-6-419; MOP Volume II, Part 3, §4.11)
- 9. Proprietary or trade secret information provided to EPA will be subject to the requirements of 40 CFR Part 2, Subpart B Public Information, Confidentiality of Business Information. (40 CFR Part 2)
- 10. The emissions inventory submitted with the application for this Major Facility Review Permit is an estimate of actual emissions for the time period stated and is included only as one means of determining applicable requirements for emission sources. It does not establish, or constitute a basis for establishing, any new emission limitations. (MOP Volume II, Part 3, §4.11)

C. Requirement to Pay Fees

The permit holder shall pay annual fees in accordance with District Regulation 3, including Schedule P. (Regulation 2-6-402 & 409.13, Regulation 3; MOP Volume II, Part 3, §4.12)

D. Inspection and Entry

Access to Facility: The permit holder shall provide reasonable access to the facility and equipment which is subject to this permit to the APCO and/or to his or her designee. (Regulation 1-440, Regulation 2-6-409.3; MOP Volume II, Part 3, §4.14)

E. Records

Notwithstanding the specific wording in any requirement, all records for federally enforceable requirements shall be maintained for at least five years from the date of entry. (Regulation 2-6-501, Regulation 3; MOP Volume II, Part 3, §4.7)

I. Standard Conditions (continued)

F. Monitoring Reports

Reports of all required monitoring must be submitted to the District at least once every six months, except where an applicable requirement specifies more frequent reporting. The first reporting period for this permit shall be November 1, 1999 to April 30, 2000. The report shall be submitted by May 31, 2000. Subsequent reports shall be for the following periods: May 1st through October 31th and November 1st through April 30th, and are due on the last day of the month after the end of the reporting period. All instances of noncompliance shall be clearly identified in these reports. The reports shall be certified by the responsible official as true, accurate, and complete. In addition, all instances of noncompliance with the permit shall be reported in writing to the District's Compliance and Enforcement Division within 10 calendar days of the discovery of the incident. Within 30 calendar days of the discovery of any incident of non-compliance, the facility shall submit a written report including the probable cause of non-compliance and any corrective or preventative actions. The reports shall be sent to the following address:

Bay Area Air Quality Management District Director of Compliance and Enforcement 939 Ellis Street San Francisco, CA 94109 Attn: Title V Reports

(Regulation 2-6-502, Regulation 3; MOP Volume II, Part 3, §4.7)

G. Compliance Certification

Compliance certifications shall be submitted annually by the responsible official of this facility to the Bay Area Air Quality Management District and to the Environmental Protection Agency. The certification period will be November 1st to October 31st. The certification shall be submitted by November 30th of each year. The certification must list each applicable requirement, the compliance status, whether compliance was continuous or intermittent, the method used to determine compliance, and any other specific information required by the permit. The permit holder may satisfy this requirement through submittal of District-generated Compliance Certification forms. The certification should be directed to the District's Compliance and Enforcement Division at the address above, and a copy of the certification should be sent to the Environmental Protection Agency at the following address:

Director of the Air Division USEPA, Region IX 75 Hawthorne Street San Francisco, CA 94105 Attention: Air-3

Permit for Facility #: B1362 Expiration Date: October 31, 2004

ID: DNS

I. Standard Conditions (continued)

(MOP Volume II, Part 3, §4.5 and 4.15)

H. Emergency Provisions

- 1. The permit holder may seek relief from enforcement action in the event of a breakdown, as defined by Regulation 1-208 of the District's Rules and Regulations, by following the procedures contained in Regulations 1-431 and 1-432. The District will thereafter determine whether breakdown relief will be granted in accordance with Regulation 1-433. (MOP Volume II, Part 3, §4.8)
- 2. The permit holder may seek relief from enforcement action for a violation of any of the terms and conditions of this permit caused by conditions beyond the permit holder's reasonable control by applying to the District's Hearing Board for a variance pursuant to Health and Safety Code Section 42350. The Hearing Board will determine after notice and hearing whether variance relief should be granted in accordance with the procedures and standards set forth in Health and Safety Code Section 42350 et seq. Any variance granted by the Hearing Board from any term or condition of this permit which lasts longer than 90 days will be subject to EPA approval. (MOP Volume II, Part 3, §4.8)
- 3. Notwithstanding the foregoing, the granting by the District of breakdown relief or the issuance by the Hearing Board of a variance will not provide relief from federal enforcement unless the Major Facility Review Permit has been modified pursuant to Regulation 2, Rule 6. (MOP Volume II, Part 3, §4.8)

I. Severability

In the event that any provision of this permit is invalidated by a court or tribunal of competent jurisdiction, or by the Administrator of the EPA, all remaining portions of the permit shall remain in full force and effect. (Regulation 2-6-409.5; MOP Volume II, Part 3, §4.10)

II. EQUIPMENT LIST

A. Permitted Source List

Each of the following sources has been issued a permit to operate pursuant to the requirements of BAAQMD Regulation 2-1-302.

Table II-A

S-#	Description	Make or Type	Model	Capacity
S-1	Glass melting furnace (natural gas)	Soda lime general furnace - Company design		56 MMBTU/hr; 320 ton/day max.
S-11	Shop equipment	Kelco	6H3842, Serial #5931	0.3 ton/hr max.
S-12	Glass forming machine - shop 1	Company design		4.5 tons/hr max.
S-13	Glass forming machine - shop 2	Company design		4.5 tons/hr max.
S-14	Glass forming machine - shop 3	Company design		4.5 tons/hr max.
S-16	Hot glass coating - shop 1	Certincoat	724R	0.5 ton/hr max
S-17	Hot glass coating - shop 2	Certincoat	723L	0.5 ton/hr max.
S-18	Hot glass coating - shop 3	Certincoat	732L	0.5 ton/hr max.
S-28	Minors storage bin	Concrete silo		10 tons/hr max.
S-29	Raw material storage bins	Concrete silos		
S-30	Premix material conveyor	Booth		1 ton/hr max.
S-33	Sandblasters	Guyson	CM1000	0.0008 ton/hr max.
S-39	Truck unloading/transferring	Company design		
S-43	Railcar/Truck unloading/ transferring	Company design		
S-45	Batch mixer	Voeller Cycle	650	25 tons/hr max.
S-47	Basement Elevator (Batch)			
S-49	Frit feeder	Ferro		0.044 ton/hr max.
S-50	Storage Bin	Company design		
S-51	Material receiver	Company design		
S-52	Basement conveyor (Shaker)	Conveyor		
S-53	Batch materials scale	Scale		
S-101	Cullet crusher	Kue - Ken	Model 35	10 tons/hr max.

III. GENERALLY APPLICABLE REQUIREMENTS

The permit holder shall comply with all applicable requirements, including those specified in the BAAQMD and SIP Rules and Regulations and other federal requirements cited below. These requirements apply in a general manner to the facility and/or to sources exempt from the requirement to obtain a District Permit to Operate. The District has determined that these requirements would not be violated under normal, routine operations, and that no additional periodic monitoring or reporting to demonstrate compliance is warranted. In cases where a requirement, in addition to being generally applicable, is also specifically applicable to one or more sources, the requirement and the source are also included in Section IV, Source-Specific Applicable Requirements, of this permit.

The dates in parenthesis in the Title column identify the versions of the regulations being cited and are, as applicable:

- 1. BAAQMD regulation(s): The date(s) of adoption or most recent amendment of the regulation by the District Board
- 2. Any federal requirement, including a version of a District regulation that has been approved into the SIP: The most recent date of EPA approval of any portion of the rule, encompassing all actions on the rule through that date

The full language of SIP requirements is included in Appendix A of this permit if the SIP requirement is different from the current BAAQMD requirement.

NOTE:

There are differences between the current BAAQMD rule and the version of the rule in the SIP. For specific information, contact the District's Rule Development Section of the Enforcement Division. All sources must comply with <u>both</u> versions of the rule until US EPA has reviewed and approved (or disapproved) the District's revision of the regulation.

Subpart F, 40 CFR 82.166	Records of Refrigerant	Y

IV. SOURCE-SPECIFIC APPLICABLE REQUIREMENTS

The permit holder shall comply with all applicable requirements, including those specified in the BAAQMD and SIP Rules and Regulations and other federal requirements cited below. The requirements cited in the following tables apply in a specific manner to the indicated source(s).

The dates in parenthesis in the Title column identify the versions of the regulations being cited and are, as applicable:

- 1. BAAQMD regulation(s): The date(s) of adoption or most recent amendment of the regulation by the District Board
- 2 Any federal requirement, including a version of a District regulation that has been approved into the SIP: The most recent date of EPA approval of any portion of the rule, encompassing all actions on the rule through that date

The full text of each permit condition cited is included in Section V, Permit Conditions, of this permit. The full language of SIP requirements is included in Appendix A of this permit if the SIP requirement is different from the current BAAQMD requirement. All other text may be found in the regulations themselves.

V. SCHEDULE OF COMPLIANCE

The permit holder shall continue to comply with all applicable requirements cited in this permit. The permit holder shall also comply with applicable requirements that become effective during the term of this permit.

VI. PERMIT CONDITIONS

Any condition that is preceded by an asterisk is not federally enforceable.

A. Source Specific Permit Conditions

Condition # 4826

For S-28, S-29, Storage bins

- 1. The Permit holder shall keep the Baghouses, A-101 through A-108 and A-110, in good operating condition. (basis: Regulation 6-301)
- 2. All particulate matter emissions from S-29 shall be routed to the baghouses A-101 through A-108. (basis: Regulation 6-301, 6-310, 6-311)
- 3. Particulate matter emissions from S-28 shall be routed to the baghouse A-110. (basis: Regulation 6-301, 6-310, 6-311)
- 4. Within 6 months of final issuance of the Major Facility Review permit, the permit holder shall install a District-approved manometer or other District-approved device which measures the pressure drop across each baghouse. Within 9 months of final issuance of the Major Facility Review permit, the permit holder shall determine the proper pressure drop range for each baghouse. These ranges shall be submitted to the Permits Division of the District for inclusion in the permit as an administrative permit amendment. (basis: cumulative increase)
- 5. After installation of the manometers or devices, pressure drop across the baghouses shall be monitored at all times that the above sources are operated and recorded once a week to ascertain that the pressure drops are in the normal operating range, and the baghouses are in good operating condition. The records shall be kept on site for at least five years from the date of data entry and be made available to the District staff for inspection. (basis: Regulation 2-6-501)

Permit for Facility #: B1362 Expiration Date: October 31, 2004

ID: DNS

VI. Permit Conditions (continued)

Condition # 4826

For S-28, S-29, Storage bins

6. Each baghouse shall be inspected on an annual basis to ensure proper operation. Records of each annual inspection shall be kept on site for at least five years from the date of data entry and be made available to the District staff for inspection. (basis: Regulation 2-6-501)

Condition # 5002

For S-30, Pre-mix Material Conveyor

- 1. The Permit Holder shall keep the Baghouses, A-109 and A-111, in good operating condition. (basis: Regulation 6-301)
- 2. Particulate matter emissions from S-30 shall be routed to the baghouses A-109 and A-111. (basis: Regulation 6-301, 6-310, 6-311)
- 3. Within 6 months of final issuance of the Major Facility Review permit, the permit holder shall install a District-approved manometer or other District-approved device which measures the pressure drop across each baghouse. Within 9 months of final issuance of the Major Facility Review permit, the permit holder shall determine the proper pressure drop range for each baghouse. These ranges shall be submitted to the Permits Division of the District for inclusion in the permit as an administrative permit amendment. (basis: cumulative increase)
- 4. After installation of the manometers or devices, pressure drop across the baghouses shall be monitored at all times that the above sources are operated and recorded once a week to ascertain that the pressure drops are in the normal operating range, and the baghouses are in good operating condition. The records shall be kept on site for at least five years from the date of data entry and be made available to the District staff for inspection. (basis: Regulation 2-6-501)
- 5. Each baghouse shall be inspected on an annual basis to ensure proper operation. Records of each annual inspection shall be kept on site for at least five years from the date of data entry and be made available to the District staff for inspection. (basis: Regulation 2-6-501)

Permit for Facility #: B1362 Expiration Date: October 31, 2004

ID: DNS

VI. Permit Conditions (continued)

Condition # 8756

For S-1, Glass Melting Furnace

- 1. Total glass pulled at this facility shall not exceed 107,670 tons in any consecutive twelve month period. (basis: cumulative increase)
- 2. Plant shall maintain monthly records of the amount of glass pulled at this facility. Records shall be retained on site for <u>five</u> years from the date of entry, and be available for inspection by District staff upon request. (basis: Regulation 2-6-501; cumulative increase)
- 3. A District-approved source test shall be conducted annually and submitted to the District within 30 days of the test date to demonstrate compliance with the following:
 - a. Nitrogen oxides emission limit of 5.5 lb/ton of glass pulled (basis: Regulations 9-12-301, 9-12-501)
 - b. Sulfur dioxide emission limit of 300 ppm (dry). (basis: Regulation 9-1-301)
 - c. PM grain loading of 0.15 gr/dscf, and emission limit of 40 lb/hr (basis: Regulation 6-310, 6-311)
 - d. Lead emission limit of 15 lb/day (basis: Regulation 11-1-301) (basis: Regulation 2-6-501)
- 4. Visible particulate emissions from S-1 shall be monitored weekly using either the District method (Manual of Procedures, Volume I, Evaluation of Visible Emissions) or EPA Method 9, and shall not exceed 1.0 on Ringelmann chart. Weekly records of visible emissions data shall be retained on site for a minimum period of five years from the date of data entry and be made available to District staff for inspection. (basis: Regulation 6-301, Regulation 2-6-501)
- 5. The glass melting furnace shall be fired exclusively with natural gas, liquefied petroleum gas, or any combination thereof. (basis: cumulative increase)

Permit for Facility #: B1362 Expiration Date: October 31, 2004

ID: DNS

VI. Permit Conditions (continued)

Condition # 11513

For S-39, Truck unloading/transferring For S-43, Railcar/Truck unloading/transferring

S-39 Truck Unloading and Transfer abated by:

A-113 Baghouse; MAC Equipment AVS Filter, Model: 96AVS25, Bags: 25, Cloth Area: 332 Sq. Ft., Fan Rating: 2000 cfm; and

A-114 Baghouse; MAC Equipment AVS Filter, Model: 72AVS25, Bags: 25, Cloth Area: 245 Sq. Ft., Fan Rating: 1400 cfm

- 1. Particulate matter emissions from S-39 west side unloading conveyor belt shall be routed under negative pressure to A-113 for abatement at all times that S-39 is operated and/or emits particulate matter emissions. (basis: cumulative increase)
- 2. Particulate matter emissions from S-39 silo top shall be routed under negative pressure to A-114 for abatement at all times that S-39 is operated and/or emits particulate matter emissions. (basis: cumulative increase)
- 3. A District-approved manometer or other District-approved device shall be operated at A-113 which measures the pressure drop across the A-113 Baghouse. (basis: cumulative increase)
- 4. A District-approved manometer or other District-approved device shall be operated at A-114 which measures the pressure drop across the A-114 Baghouse. (basis: cumulative increase)
- 5. Within 3 months of final issuance of the Major Facility Review permit, the permit holder shall determine the proper pressure drop range for each baghouse. These ranges shall be submitted to the Permits Division of the District for inclusion in the permit as an administrative permit amendment. (basis: cumulative increase)
- 6. The outlet grain loading of A-113 shall not exceed 0.02 grain per dry standard cubic foot of exhaust effluent. (basis: cumulative increase)
- 7. The outlet grain loading of A-114 shall not exceed 0.02 grain per dry standard cubic foot of exhaust effluent. (basis: cumulative increase)

Permit for Facility #: B1362 Expiration Date: October 31, 2004

ID: DNS

VI. Permit Conditions (continued)

Condition # 11513

- 8. A District approved source test shall be conducted once per permit term on each baghouse, A-113 and A-114, and submitted to the District with Title V permit renewal application to demonstrate compliance with parts # 6 and #7 of this condition. (basis: cumulative increase)
- 9. Pressure drop across A-113 and A-114 shall be monitored at all times S-39 is operated and recorded once a week to ascertain that the pressure drop is in the normal operating range, and baghouses are in good operating condition. The records shall be kept on site for at least five years from the date of data entry and be made available to the District staff for inspection. (basis: Regulation 2-6-501)
- 10. A-113 and A-114, Baghouses, shall be inspected on an annual basis to ensure proper operation. Records of each annual inspection shall be kept on site for at least five years from the date of data entry and be made available to the District staff for inspection. (basis: Regulation 2-6-501)
- S-43 Railcar/Truck Unloading and Transferring abated by A-7
- 11. Particulate matter emissions from S-43 shall be routed under negative pressure to A-7 for abatement at all times that S-43 is operated and/or emits particulate matter emissions. (basis: cumulative increase)
- 12. A District-approved manometer or other District-approved device shall be operated at A-7 which measures the pressure drop across the A-7. Within 3 months of final issuance of the Major Facility Review permit, the permit holder shall determine the proper pressure drop range for each baghouse. These ranges shall be submitted to the Permits Division of the District for inclusion in the permit as an administrative permit amendment. Pressure drop across A-7 shall be monitored at all times S-43 is operated and recorded once a week to ascertain that the pressure drop is in the normal operating range, and baghouse is in good operating condition. The records shall be kept on site for at least five years from the date of data entry and be made available to the District staff for inspection. (basis: cumulative increase, Regulation 2-6-501)
- 13. A-7, Baghouse shall be inspected on an annual basis to ensure proper operation.

Permit for Facility #: B1362 Expiration Date: October 31, 2004

ID: DNS

VI. Permit Conditions (continued)

Records of each annual inspection shall be kept on site for at least five years from the date of data entry and be made available to the District staff for inspection. (basis: Regulation 2-6-501)

Condition # 15452

For S-45, S-47, S-50, S-51, S-52, S-53

- S-45 Batch Mixer abated by A-45, capacity 3500 acfm
- S-47 Basement Elevator (Batch) abated by A-45, capacity 3500 acfm
- S-52 Basement Conveyor (Shaker) abated by A-45, capacity 3500 acfm
- S-53 Batch Materials Scale abated by A-45, capacity 3500 acfm
- 1. Particulate matter emissions from the <u>S-45</u>, <u>Batch mixer</u>, <u>S-47</u>, <u>Basement elevator</u>, S-52, Basement Conveyor, and S-53, Scale, shall be routed under negative pressure to A-45 for abatement at all times when any of these sources is operated and/or emits particulate matter emissions. (basis: cumulative increase)
- 2. A District-approved manometer or other District approved device shall be operated at A-45 which measures the pressure drop across the A-45 Baghouse. (basis: cumulative increase)
- 3. The outlet grain loading of A-45 shall not exceed 0.02 grain per dry standard cubic foot of exhaust gas. (basis: cumulative increase)
- S-50 Storage Bin abated by A-50 MAC 96AVR21, Capacity: 1100 ACFM
- 4. Particulate matter emissions from the S-50, Salt Cake Storage bin, shall be routed under negative pressure to A-50, Baghouse, for abatement at all times when S-50 is operated and/or emits particulate matter emissions. (basis: cumulative increase)
- 5. A District-approved manometer or other District-approved device shall be operated at A-50 Baghouse which measures the pressure drop across the A-50 Baghouse. (basis: cumulative increase)
- 6. The outlet grain loading of A-50 shall not exceed 0.02 grain per dry standard cubic foot of exhaust gas. (basis: cumulative increase)

Permit for Facility #: B1362 Expiration Date: October 31, 2004

ID: DNS

VI. Permit Conditions (continued)

Condition # 15452

- S-51 Material Receiver abated by A-51 Material Receiver Baghouse; MAC19AVRCF, Capacity: 290 ACFM
- 7. Particulate matter emissions from the S-51 Material Receiver shall be routed under negative pressure to A-51 Baghouse for abatement at all times when S-51 is operated and/or emits particulate matter emissions. (basis: cumulative increase)
- 8. A District-approved manometer or other District-approved device shall be operated at A-51 Baghouse which measures the pressure drop across the A-51 Baghouse. (basis: cumulative increase)
- 9. The outlet grain loading of A-51 shall not exceed 0.02 grain per dry standard cubic foot of exhaust gas. (basis: cumulative increase)
- 10. A District approved source test shall be conducted and submitted to the District with the Title V permit renewal application to demonstrate compliance with parts #4, #8, and #12 of this condition once during the permit term. (basis: cumulative increase)
- 11. Pressure drop across A-45, A-50, and A-51 shall be monitored at all times S-45, S-47, S-50, S-51, S-52, and S-53 are operated and recorded weekly to ascertain that the pressure drop is in the normal operating range, and the baghouses are in good operating condition. Within 3 months of final issuance of the Major Facility Review permit, the permit holder shall determine the proper pressure drop range for each baghouse. These ranges shall be submitted to the Permits Division of the District for inclusion in the permit as an administrative permit amendment. The records shall be kept on site for at least five years from the date of data entry and be made available to the District staff for inspection. (basis: Regulation 2-6-501)
- 12. A-45, A-50, and A-51, Baghouses shall be inspected on an annual basis to ensure proper operation. Records of each annual inspection shall be kept on site for at least five years from the date of data entry and be made available to the District staff for inspection. (basis: Regulation 2-6-501)

Permit for Facility #: B1362 Expiration Date: October 31, 2004

ID: DNS

VI. Permit Conditions (continued)

Condition #15747

For S-101, Cullet Crusher

- 1. Particulate matter emissions from the operation of S-101 shall always be routed to baghouse, A-7. (basis: Regulation 6)
- 2. The baghouse, A-7, shall be maintained in good operating condition. (basis: Regulation 6)
- 3. A District-approved manometer or other District-approved device shall be operated at A-7 which measures the pressure drop across A-7. Within 3 months of final issuance of the Major Facility Review permit, the permit holder shall determine the proper pressure drop range for each baghouse. These ranges shall be submitted to the Permits Division of the District for inclusion in the permit as an administrative permit amendment. Pressure drop across A-7 shall be monitored at all times S-43 or S-101 is operated and recorded once a week to ascertain that the pressure drop is in the normal operating range, and baghouse is in good operating condition. The records shall be kept on site for at least five years from the date of data entry and be made available to the District staff for inspection. (basis: cumulative increase, Regulation 2-6-501)
- 4. A-7, Baghouse shall be inspected on an annual basis to ensure proper operation. Records of each annual inspection shall be kept on site for at least five years from the date of data entry and be made available to the District staff for inspection. (basis: Regulation 2-6-501)

Condition #16601

For Sources S-11, Shop Equipment; S-12 to S14, Glass Forming Machines; S-16 to S-18, Hot Glass Coating; S49, Frit Feeder

- 1. The owner/operator of S-11, S-12, S-13, S-14, S-16, S-17, S-18, S-33, and S-49 shall conduct weekly visible emissions monitoring in order to determine compliance with Regulations 6-301 using either District method or EPA Method 9, and shall not exceed a Ringelmann 1.0. Weekly records of visible emissions data shall be retained on site for at least five years from the date of entry and be made available to District staff upon request. (basis: Regulation 2-6-501)
- 2. Particulate matter emissions from the operation of S-11, Shop Equipment shall always be routed to A-2, Cyclone. (basis: Regulation 6)
- 3. Particulate matter emissions from the operation of S-33, Sand Blasting Equipment shall

Permit for Facility #: B1362 Expiration Date: October 31, 2004

ID: DNS

VI. Permit Conditions (continued)

always be routed to A-6, Settling Chamber. (basis: Regulation 6)

Permit for Facility #: B1362 Expiration Date: October 31, 2004 ID: DNS

VII. APPLICABLE LIMITS & COMPLIANCE MONITORING REQUIREMENTS

This section has been included only to summarize the applicable emission limits contained in Section IV, Source-Specific Applicable Requirements, of this permit. The following tables show the relationship between each emission limit and the associated compliance monitoring provisions, if any. The monitoring frequency indicates whether periodic (P) or continuous (C) monitoring is required. For periodic monitoring, the frequency of the monitoring has also been shown, either annual (A), quarterly (Q), monthly (M), weekly (W), daily (D), or on an event basis (E). No monitoring (N) has been required if the current applicable rule or regulation does not require monitoring, and the operation is unlikely to deviate from the applicable emission limit based upon the nature of the operation.

Table VII - A S1 - GLASS MELTING FURNACE

Type of	Emission Limit	FE	Future Effective		Monitoring Requiremen	Monitoring Frequency	Monitoring
limit	Citation	Y/N	Date	Emission Limit	t Citation	(P/C/N)	Type

VIII. TEST METHODS

The test methods associated with the emission limit of a District regulation are generally found in Section 600 of the regulation. The following table indicates only the test methods associated with the emission limits referenced in Section VII, Applicable Emission Limits & Compliance Monitoring Requirements, of this permit.

Table VIII

Applicable		
Requirement	Description of Requirement	Acceptable Test Methods
BAAQMD	Ringelmann No. 1 Limitation	Manual of Procedures, Volume I, Evaluation of Visible
6-301		Emissions
BAAQMD	Particulate Weight Limitation	Manual of Procedures, Volume IV, ST-15, Particulates
6-310		Sampling
BAAQMD	General Emission Limitation,	Manual of Procedures, Volume IV, ST-19A, Sulfur Dioxide,

IX. GLOSSARY

BAAQMD

Bay Area Air Quality Management District

BACT

Best Available Control Technology

CAA

The federal Clean Air Act

CAAQS

California Ambient Air Quality Standards

CEQA

California Environmental Quality Act

CFR

The Code of Federal Regulations. 40 CFR contains the implementing regulations for federal environmental statutes such as the Clean Air Act. Parts 50-99 of 40 CFR contain the requirements for air pollution programs.

CO

Carbon Monoxide

Cumulative Increase

The sum of permitted emissions from each new or modified source since a specified date pursuant to BAAQMD Rule 2-1-403, Permit Conditions (as amended by the District Board on 7/17/91) and SIP Rule 2-1-403, Permit Conditions (as approved by EPA on 6/23/95). Used to determine whether threshold-based requirements are triggered.

District

The Bay Area Air Quality Management District

EPA

The federal Environmental Protection Agency.

Excluded

Not subject to any District Regulations.

Federally Enforceable, FE

All limitations and conditions which are enforceable by the Administrator of the EPA including those requirements developed pursuant to 40 CFR Part 51, subpart I (NSR), Part 52.21 (PSD),

Permit for Facility #: B1362 Expiration Date: October 31, 2004

ID: DNS

Part 60, (NSPS), Part 61, (NESHAPs), Part 63 (HAP), and Part 72 (Permits

Permit for Facility #: B1362 Expiration Date: October 31, 2004

ID: DNS

IX. Glossary

Regulation, Acid Rain), and also including limitations and conditions contained in operating permits issued under an EPA-approved program that has been incorporated into the SIP.

HAP

Hazardous Air Pollutant. Any pollutant listed pursuant to Section 112(b) of the Act. Also refers to the program mandated by Title I, Section 112, of the Act and implemented by both 40 CFR Part 63, and District Regulation 2, Rule 5.

Major Facility

A facility with potential emissions of regulated air pollutants greater than or equal to 100 tons per year, greater than or equal to 10 tons per year of any single hazardous air pollutant, and/or greater than or equal to 25 tons per year of any combination of hazardous air pollutants, or such lesser quantity as determined by the EPA administrator.

MFR

Major Facility Review. The District's term for the federal operating permit program mandated by Title V of the Act and implemented by District Regulation 2, Rule 6.

MOP

The District's Manual of Procedures.

NAAQS

National Ambient Air Quality Standards

NESHAPs

National Emission Standards for Hazardous Air Pollutants. Contained in 40 CFR Part 61.

NMHC

Non-methane Hydrocarbons

NOx

Oxides of nitrogen.

NSPS

Standards of Performance for New Stationary Sources. Federal standards for emissions from new stationary sources. Mandated by Title I, Section 111 of the Act, and implemented by both 40 CFR Part 60 and District Regulation 10.

NSR

New Source Review. A federal program for pre-construction review and permitting of new and modified sources of air pollutants for which the District is classified "non-attainment". Mandated by Title I of the Clean Air Act and implemented by 40 CFR Parts 51 and 52 as well as District Regulation 2, Rule 2. (Note: There are additional NSR requirements mandated by

Permit for Facility #: B1362 Expiration Date: October 31, 2004

ID: DNS

IX. Glossary

the California Clean Air Act.)

Offset Requirement

A New Source Review requirement to provide federally enforceable emission offsets at a specified ratio for the emissions from a new or modified source and any pre-existing cumulative increase minus any onsite contemporaneous emission reduction credits. Applies to emissions of POC, NOx, PM10, and SO2.

Phase II Acid Rain Facility

A facility that generates electricity for sale through fossil-fuel combustion and by virtue of certain other characteristics (defined in Regulation 2, Rule 6) is subject to Titles IV and V of the Clean Air Act.

POC

Precursor Organic Compounds

PM

Total Particulate Matter

PM10

Particulate matter with aerodynamic equivalent diameter of less than or equal to 10 microns

PSD

Prevention of Significant Deterioration. A federal program for permitting new and modified sources of air pollutants for which the District is classified "attainment" of the National Air Ambient Quality Standards. Mandated by Title I of the Act and implemented by both 40 CFR Part 52 and District Regulation 2, Rule 2.

SIP

State Implementation Plan. State and District programs and regulations approved by EPA and developed in order to attain the National Air Ambient Quality Standards. Mandated by Title I of the Act.

SO₂

Sulfur dioxide

Title V

Title V of the federal Clean Air Act. Requires a federally enforceable operating permit program for major and certain other facilities.

VOC

Volatile Organic Compounds

Permit for Facility #: B1362 Expiration Date: October 31, 2004
